Our expertise

RETAIL

AUTOMOTIVE

POSTAL AND PARCEL

RETAIL

COMBINE LOGISTICS AND MERCHANDISING

Retailers over the world are in a race to adapt their supply chain to more frequent and diverse deliveries, while maintaining the efficiency of bulk deliveries to a mixed portfolio of store formats.

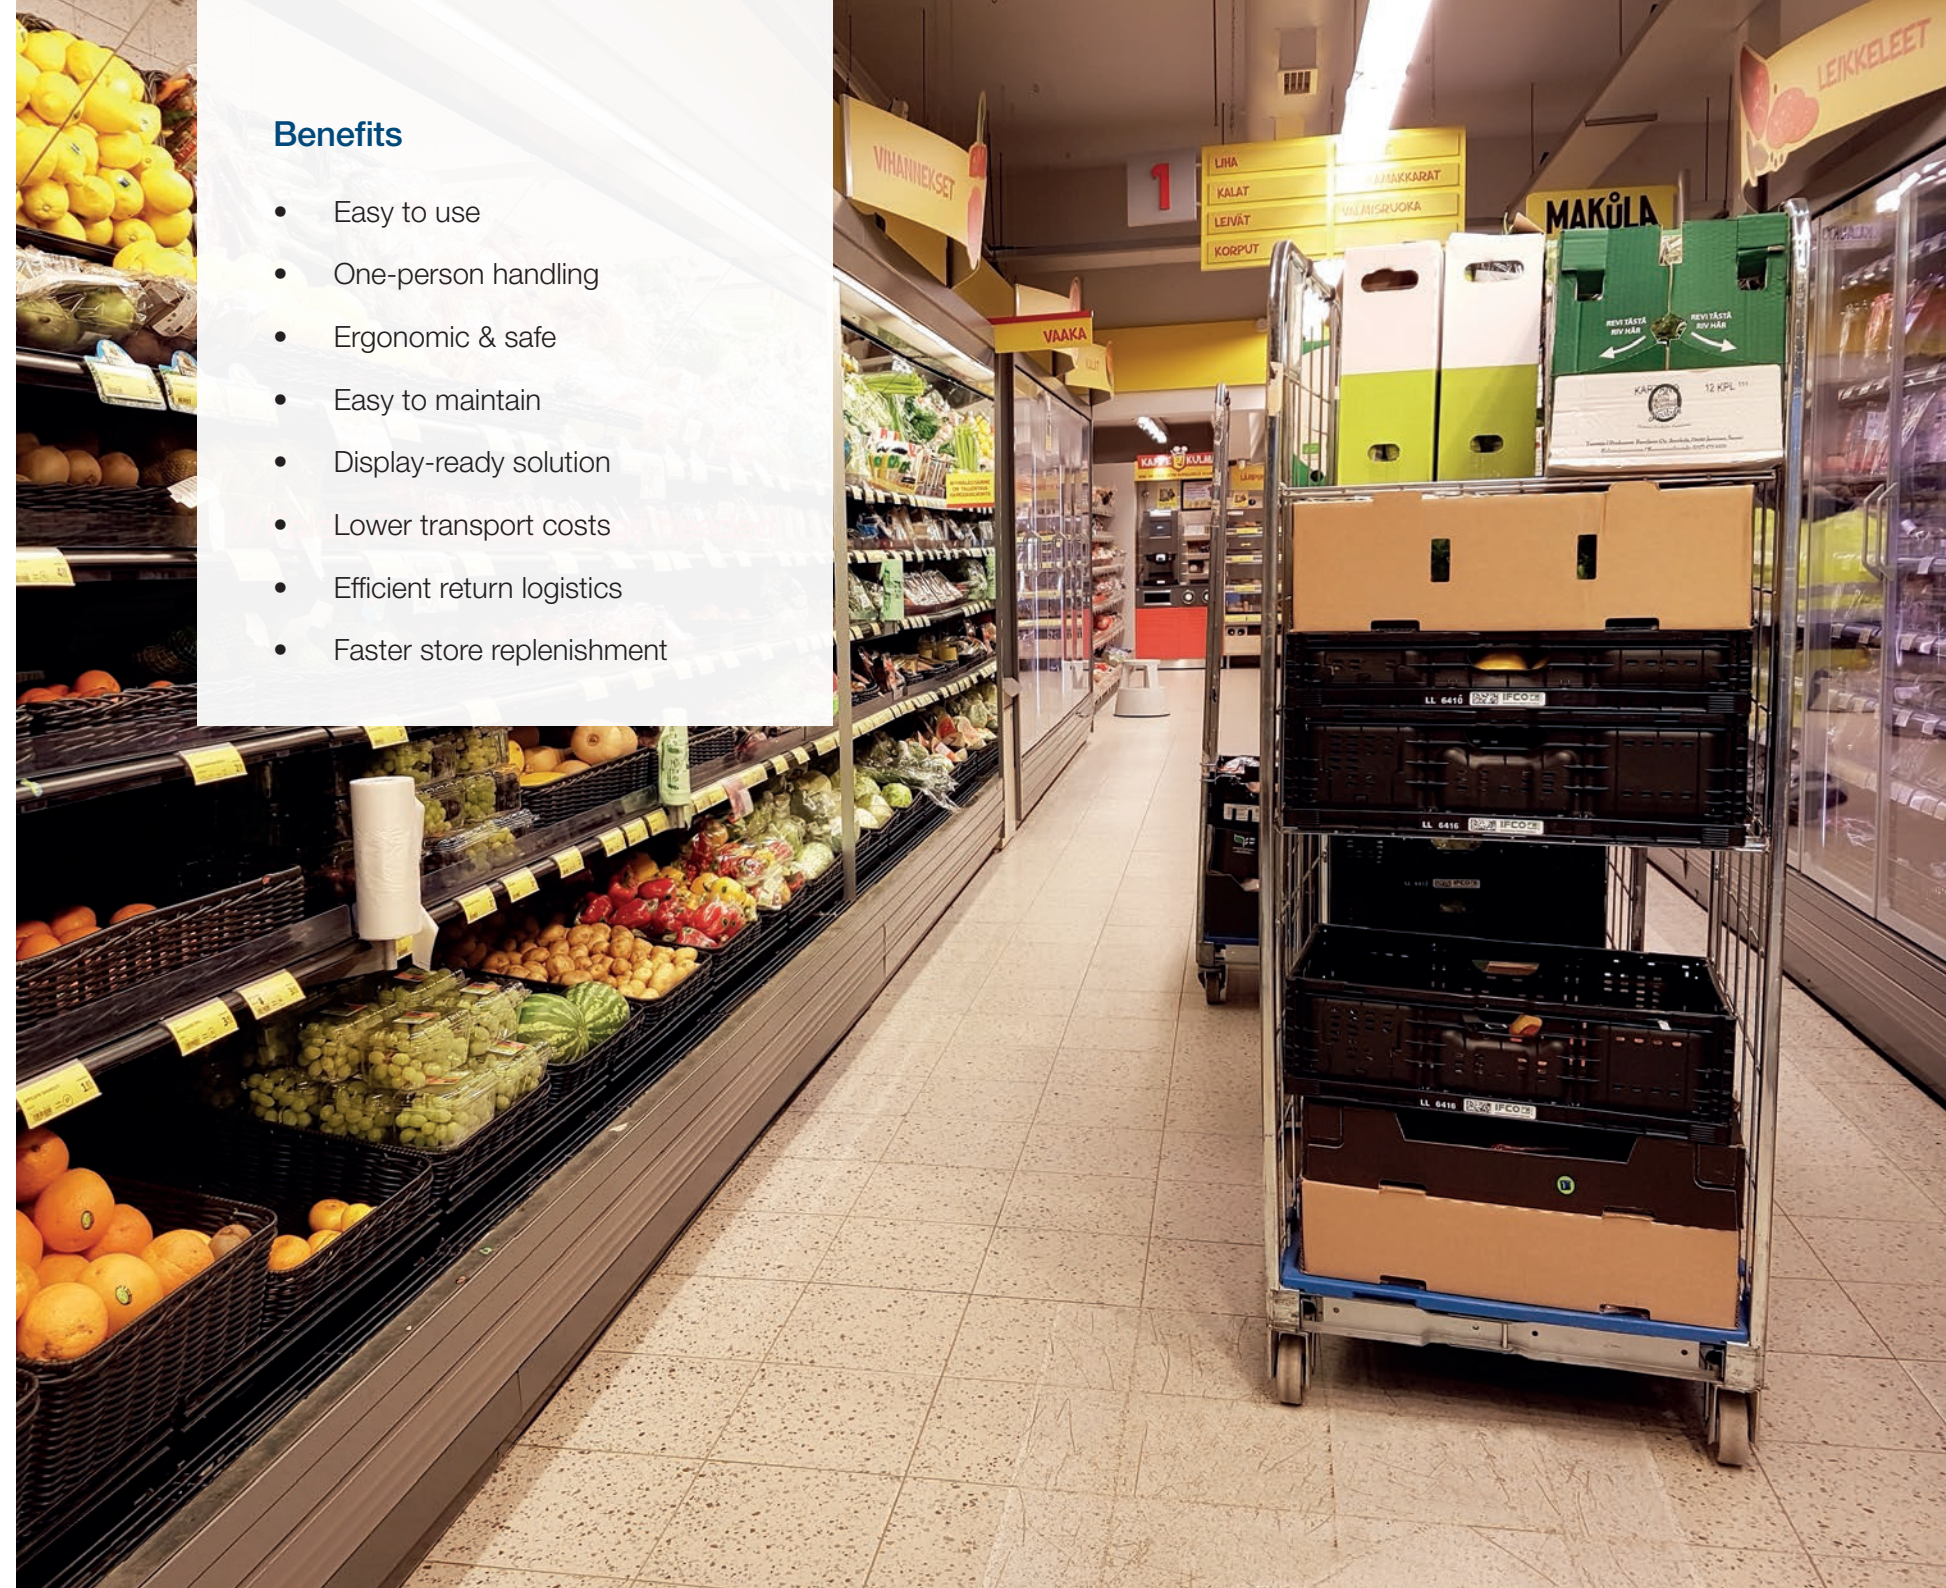

For efficiency in production, load carriers that are suitable for automated handling will make all the difference.

Our solutions enable higher cubic efficiency in transport and faster unloading to increase shelf availability and reduce your handling costs. More space-efficient solutions translate into lower warehousing needs, too.

In stores, display-ready units can decrease handling costs by 20-25%. Ergonomic, multipurpose designs will make handling simpler for the staff while attractive presentation and branding are bound to increase sales.

Benefits

- Easy to use
- One-person handling
- Ergonomic & safe
- Easy to maintain
- Display-ready solution
- Lower transport costs
- Efficient return logistics
- Faster store replenishment

“The Foldia® Roll cage design makes it possible for us to fulfill our customer requirements for easy handling, less space requirements when empty, and for a hygienic and durable design. It also enables us to reduce transport costs in reverse logistics from hubs and regional warehouses to our new central warehouse.”

“The combo tray from K.Hartwall has changed the whole beverage industry in Australia.”

RETAIL

Grocery, Dairy, and E-commerce

All retail supply chains share the need to deliver cost-effectively, both in bulk and in smaller quantities, to different locations and store sizes. Our roll containers and other wheeled load carriers meet this need by providing manual handling, easy and safe order-picking, less product damage, and efficient cubic fill in both outbound and reverse logistics.

Compactainer®

- Less manual handling
- Improved ergonomics
- Space-efficient
- Light yet robust

Foldia®

- Space-efficient (5:1 ratio)
- Fast and easy to use
- Compatible with demountable roll cages
- Easy branding
- Suitable for automation

Foldia® Plus

- Offers 5 adjustable heights
- Multipurpose unit
- Space efficient
- Easy branding
- No loose parts

Add-on Flex Doors

- Eliminate need for shrink-wrapping
- Space-efficient
- Sustainable and reusable
- Ergonomic and safe

Hybrid Dolly

- Multipurpose unit
- Robust (load capacity: 500 kg)
- Easy branding
- Stackable

RETAIL

DIY & Packaging Industry

Certain products can shift in transport or are too bulky to be safely moved on pallets. The right equipment for these types of items help DIY retailers to remarkably increase the efficiency of their supply chain. K.Hartwall provides a wide range of durable and modular load carriers for different distribution models.

Smartcube®

- Best-in-class cubic fill
- Ergonomic thanks to half-drop down gate and walk-in access
- Less product damage
- Full product visibility

Smartcube® Jumbo

- Ideal for odd-size items
- Robust
- Compatible with other SmartCubes and other MHE

HPD System® Foldable Cage

- Well-suited for the food industry
- Less product damage
- Efficient in return logistics

Significantly reduces
product damage &
shrink wrapping

AUTOMOTIVE

INCREASED SUPPLY CHAIN EFFICIENCY

Whether you are an OEM or a sub-supplier, the integration of your internal and external logistics will increase your efficiency.

Efficient, forklift-free internal logistics can cut the costs of inventory, handling and in-house transportation. Our solutions bolster Lean production principles with improved space optimization, shorter turn-around times, and improved health and safety for staff.

Benefits

- Forklift-free environment
- Improves workflow
- Reduces handling costs
- Promotes stock level reduction
- Utilizes less floor space
- Improves ergonomics
- Fast and safe truck loading

Decrease handling costs

EFFICIENCY IN OPERATIONS

Growing parcel volumes and increased competition are driving parcel operators to find new and more efficient ways of moving parcels.

Today both robotics and automation are driving a need for a new generation of parcel load carriers – where effective manual handling is combined with automation compatibility.

Having the right parcel load carrier, such as a roll cage for distribution or a foldable cage for line hauls, will make a big difference in operational efficiency. Everything from (un)loading operations in terminals, cubic fill in transportation, and automation compatibility, is affected by your choice of load carrier.

K.Hartwall works with you, and with our automation and robotics partners, to develop the best in Postal and Parcel solutions for your operations.

posti **postnord**

3-sided Foldia®

- **5:1 ratio when empty**
- Space efficient at destination and in reverse logistics
- Easy and ergonomic manual handling – no lifting
- Efficient vehicle cubic fill
- Easy branding

4-sided Compactainer®

- **No need for shrink-wrapping**
- Improves ergonomics and health & safety
- Less product damage
- One-person operation: easy handling

Parcel cage

- **100% reliable automatic tipping**
- Half-drop down gate and walk-in access for easy and ergonomic loading
- Easy branding
- Compatible with other MHE

POSTAL & PARCEL

COMPATIBLE WITH ROBOTICS AND AUTOMATION

Advanced automation technologies are utilized in the parcel supply chain to decrease the dependence on personnel. However, benefits from increased levels of automation may not be fully realized if your load carriers are not compatible or if the solution forces you to use suboptimal ways of working. Every solution has to be individually designed and all relevant factors taken into account, to ensure full compatibility and business success.

Sustainability

At K.Hartwall we strive to respect the environment in all of our operations. Our modern factory is situated in the middle of a wilderness area near the sea. In Finland we are close to nature. It is part of our DNA – not a fashion trend. Our aim is to consistently reduce the impact of our operations on the environment by using the best available technology. We develop logistics solutions which optimize your operations and support our precious planet by being reusable, space-efficient, and lightweight-yet strong enough to meet your operational needs.

TUGGER TRAINS

< 3 SECONDS

Time to lift
1 tonne

LiftLiner: SAY GOODBYE TO FORKLIFTS

The LiftLiner is a unique solution for internal logistics and an excellent choice for forklift-free environments. With it, you avoid the complexities of sequencing deliveries to the production line in advance. You can also load different sizes of K.Hartwall carts on it from both sides to truly enable a streamlined logistics process.

The crossbar coupling system offers an impressively tight and precise turning radius capability for very efficient transport.

Its “rooftop shape“ allows for ergonomic and safe handling of loads up to 1 tonne.

LIFTLINER®

Flexibility

Compatible with a wide range of cart types to efficiently and simultaneously handle loads of all shapes and sizes.

Maneuverability

Patented crossbar coupling system allows sharper turns and superior cornering.

Accessibility

Carts can be loaded and unloaded from either side, allowing you to create the fastest, most efficient routes through your facility.

Simplicity

Unique tiling technology makes it easier for operators to unload even heavy loads.

MOBILE ROBOTS

AUTOMATE YOUR LOAD CARRIER MOVEMENTS

Today, almost half of all working hours are spent on manual routine jobs. The World Economic Forum estimates that by 2035, automation will reduce that number to 35%. Key to this evolution, is the increasing deployment of AGVs and autonomous mobile robots (AMRs), which, in addition to boosting efficiency, can literally take the load off their human coworkers' backs.

COST SAVINGS

SYSTEMATIC TRACKING

IMPROVED SAFETY & LOWER DEPENDENCY ON LABOR

LESS PRODUCT DAMAGES

- ✓ Slim design
- ✓ Omnidrive
- ✓ Free navigation
- ✓ 360° safety scanning
- ✓ Long lasting Li-Ion battery
- ✓ Electrical free lift

A-MATE mobile robot can carry multiple load carriers such as pallets, carts, foldable cages, or adaptor pallets

A-MATE is the best-in-class, fully-electrical, pallet AGV. Its key advantage compared to other AGV solutions is its free lift (no scissors), which allows it to lift up to 1 tonne and as high as 1 meter.

THIS IS US

WHY K.HARTWALL?

A reliable partner who understands the trends and listens to your issues

A global player on the load carrier market

An innovative partner who can develop new solutions

A company who provides high quality and durable solutions

A supplier with a large portfolio and worldwide delivery capabilities
